Personal memo from  
JOSHUA LEDERBERG

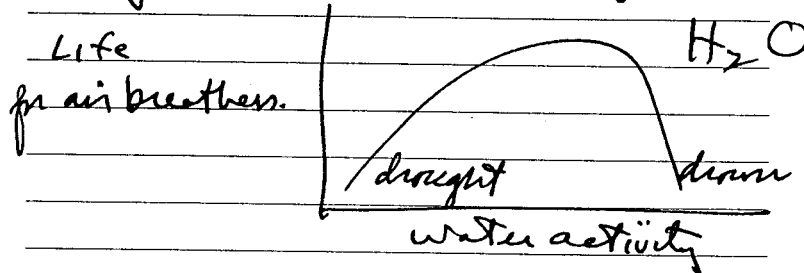

E Calabrese

5/23/00

"Hormesis" and heritable steady  
states.

Toxicity is not involved here, but the  
phenomena described by Novick-Werner  
and Mel Cohn's years ago offer a  
sound theoretical foundation for  
hormesis.

As to biphasic response, doesn't  
every metabolite have an optimum?

I look forward to stimulating reading.

Thank you responding so promptly  
with the reports.

Joshua Lederberg
